## Skills

- HTML5
- CSS3
- Bootstrap
- JavaScript
- Java
- Python3
- Django
- PostgreSQL
- Visual Paradigm

## Languages

Spanish: Native  
English: Intermediate

As a passionate computer engineer, I am dedicated to transforming innovative ideas into impactful solutions. With a focus on continuous learning and problem-solving, I strive for excellence in creating efficient software. I aim to contribute my creativity and energy to dynamic teams, working on projects that exceed expectations. My goal is to grow professionally in a collaborative environment and make a meaningful impact in technology.

## Work experience

**National Center for Research in Agricultural Health**  
Tech Support - [2023 - 2024].

- Web development and maintenance:** Designed, developed, and maintained the company website using technologies such as HTML, CSS3, JavaScript, Django, ensuring functionality and an optimal user experience.
- Database management:** Managed and optimized databases related to the center's research activities, developing advanced SQL queries to generate reports and improve data accessibility.
- Hardware maintenance:** Performed diagnostics, repairs, and upgrades on the center's hardware, ensuring proper functionality and extending equipment lifespan.

## Education

**Bachelor's degree in Computer Engineering**  
University of Havana - Year [2020 - 2024].
